ಸತ್ಯ ಪ್ರತಿಜ್ಞೆಯ ಮೇರೆಗೆ.

ಮುಖ್ಯ ವಿಚಾರಣೆ ಮಾನ್ಯ ಸಸಲ ಅವರಿಂದ :

I was worked as a Medical Officer in PHC at Nimbarga from 2005 to 2015.

A patient by name Shivanand S/o Revansidda aged about 25years and Revansiddappa Age. 50Years were came to our hospital with the history of injuries on 18.10.2013 at about 10.00 a.m.

On examination of the above said Shivanand S/o Revansidda I found the following injury.

- 1) No external injuries were seen

On examination of the above said Revansiddappa I found the following injury.

- 1) Swelling on the head measuring 2x3 c.m on perital region of head.
- 2) Swelling of the left hand 2x2c.m.

I have referred the Revansiddappa to GGH Gulbarga for X-ray and city brain. After gathering report it was found that track fracture of left 3rd metacropitel city scan brain normal study. Extra crenial soft tissue contusion in right paretal region.

I have opined that the above mentioned injuries are grievous in nature, and might have caused by hard and blunt object. And age of injury was recent. Witness identify the signature on the wound certificate, hence wound certificate are marked as Ex.P-4, Ex.P-5 signature of the witness is marked as Ex.P-4(a) Ex.P-5(a).

ಪಾಟೀ ಸವಾಲು: ಆರೋಪಿತರ ಪರ ಶ್ರೀ ಎಸ್.ಎ.ಕೆ. ವಕೀಲರರಿಂದ.

It is true to say that it is mandatory to mention the minimum two identification marks of the patient in wound certificate. It is true to say that I have not mention the identification marks of the patient in Ex.P-4 and 5 to identify the patients. The injury like soft tissue contusion can be caused if any person fell down on the hard surface. If any swelling on the body there may be any chance of itching, but it is not mandatory there should be itching.

It is true to say that if any person found any swelling injuries on his body if he has found itching if he itch it that injuries can be seen that as fresh injury. While seeing the blood on the injury I have find it as recently. It is true to say that I have not mentioned in Ex.P-5 while examination of the patient I have found the bleeding or blood marks or abrasion over the injuries. I have forgotten who have brought the records from the GGH Kalaburagi. It is true to say that I have not treated the greivous injuries of the patient only referred the patient to the GGH after first aid. It is true to say that I have not mentioned the age of the injury, except recently. It is true
