2. The said features are:

(i) The placement of a gusset plate in such a manner as to shift the load from the top of the cross member to the bottom of the cross member and the tube.

(ii) Creation of extra space for battery storage.

(iii) Increase in the size and capacity of the utility box.

3. Submissions were also made on behalf of the respondent. Since learned counsel for the appellant seeks time to place on record experimental data with regard to the extent to which the load is shifted in the claimed invention, list the matter on 05.06.2025.
